Hassan Alti

Full Stack Developer skilled in Node.js, React.js, TypeScript, and Next.js. Expertise in scalable applications, API development, AI solutions, and databases like MongoDB and PostgreSQL, with a strong ability to adapt to client needs across industries.

Skills

- **Programming Languages**: JavaScript, TypeScript, SQL, Python

- **Frontend**: React, Next.js, Tailwind CSS, Shadcn

- **Mobile**: React Native, Expo

- **Backend**: Node.js, NestJS, Express

- **Databases**: PostgreSQL, MongoDB, Redis, MySQL

Work Experience

FULL STACK DEVELOPER | Elephants Ride   **02/2025 - Present**

- Built scalable applications using TypeScript, PostgreSQL, Next.js, and React with TanStack for enhanced API integration and state management.
- Designed and implemented cron jobs and data scrapers while integrating multiple API vendors into unified services.
- Translated Figma designs into responsive, user-friendly interfaces and participated in management meetings to align technical solutions with business objectives.

FULL STACK DEVELOPER | FREELANCE   **10/2022 - 08/2024**

- Delivered 16+ client projects, maintaining a 5/5 rating and 100% client satisfaction. View Testimonials

- Developed an automated product article generation app with web scraping, markdown exports, and an admin dashboard, saving 50+ hours per month of labor for an e-commerce company.

- Engineered 2 AI-driven SaaS applications with scalable backend architectures using NestJS, MongoDB, Redis, and modern frontends with React.js, Next.js, and Tailwind CSS.

- Increased customer response rates by 300% for a UK-based restaurant/pub by building an AI-powered review response tool integrating TripAdvisor and Google Reviews with Puppeteer.

Projects

BloomSkin App (React Native + Node.js)

Built for bloomskin.pl as a comprehensive skincare management platform, BloomSkin helps users manage their skincare routines, explore treatments, and shop for products—all within an intuitive mobile experience. Project Link

Leewou - Influencer Marketing Platform

Leewou is an influencer marketing platform designed to help brands discover, analyze, and track campaigns with over 350 million influencers across TikTok, Instagram, and YouTube. Project Link

Education
